SQL Complete

Code Quality | Application Performance | Team Productivity | Code Maintainability

About us

We are currently one of the leading developers of database management software for 40 000 companies in more than 140 countries. Using the latest technology, we create innovative software products that unlock limitless potential for over 500K developers worldwide. We are committed to delivering world-class products and providing the highest quality advice and support.

Since 1997

Founded in 1997, Devart is currently one of the leading developers of database management software, ALM solutions, and data providers for most popular database servers.

Focused On

We create database tools, ALM solutions, data providers, data integration and backup solutions as well as web and cloud services.

200+ Specialist

More than two hundred highly qualified professionals contribute their knowledge and expertise to ensure that our products and services are among the best in the world.

R&D Office

Our R&D center is based in Kharkiv (Ukraine), while our head office is located in Prague (Czech Republic).

SQL Complete

Your coding guru

Available as an add-in for SSMS and VS, the tool provides context-aware code completion, enabling SQL developers and DBAs to write code faster. SQL Complete is packed with useful features tailored to empower development teams to be more productive.

Because performance matters

Best DBA Solution

Best Database Development Solution

ComponentSource Award

Used and Trusted by Enterprises Around the World

Thousands of companies all over the globe choose SQL Complete.

Top Reasons to Use SQL Complete

Clean, high-quality code

Develop pure and error-free code with IntelliSense-style code-completion.

Productivity boost

Use a rich collection of built-in snippets, modify and/or create the custom ones to double your coding speed.

Early error detection

Catch and fix errors before they get into production with the advanced T-SQL Debugger functionality.

SQL Complete is one of the greatest tools I've seen for SQL Server. Congratulation for this great tool. It helps me so much write powerful SQL statements.

ANDREAS FUCHS, IT Systemtechnik, Soennecken

Top Reasons to Use SQL Complete

Instant code formatting

Use a wide selection of predefined formatting styles to easily improve code readability and introduce unified code formatting standards within your company.

Automatic code refactoring

Breathe new life into legacy T-SQL code and make it more efficient and maintainable.

Timely customer service

We value our customers and strive for excellent service. We're fast, friendly, and we know our product inside and out.

I'm a professional SQL Server developer with over 10 years of experience. I tried a lot of different SQL Server tools and IDEs and finally stuck with SQL Complete. Why? Because it has pretty much everything SQL developer needs. Snippets, intellisense, query history, smart data copy, automatic CRUD, ... I've just started. It's a great product with rich functionality. I definitely recommend it.

DMITRIJ KULTASEV, SQL Server Database Developer

How SQL Complete empowers its customers

Financial services sector

IMPROVE WORK EFFICIENCY

With qualitative data analysis and reporting

SQL Complete boosts the speed of the BI department by allowing analysts to get the best and the most precise understanding of the database structure.

STAY FOCUSED

With T-SQL coding assistance

SQL Complete takes care of code completion, so you can concentrate on how the code actually works.

SAVE TIME

With Grid aggregates

The possibility to calculate aggregates in the result grid is a big time saver.

The advantages of using SQL Complete are largely in how well it performs within the SSMS product. SQL Complete is a big time saver.

SAM DUVAL, Data Quality Analyst Elements Financial

How SQL Complete empowers its customers

Information technology sector

3X WORK OUTPUT

With Finding Invalid Objects

Detect and fix invalid objects that often appear during database development process. Used along with other features, it can increase your working output 2-3x.

STAY IN THE KNOW

With Tabs Coloring

Tab coloring allows company developers to know which database they are on at a glance and thus minimizes the risk of running queries on wrong environments.

INCREASE PRODUCTIVITY

With Wildcard Expansion

SQL Complete eliminates the necessity to type column names and thus boosts productivity of the team.

STOP WRITING THE SAME CODE TWICE

With Query History

With SQL query history, developers never lose scripts they worked with since queries are saved and you can re-use them anytime.

SQL Complete is like SSMS IntelliSense on steroids, plus so many other features including join statement completion, tab coloring, wildcard expansion, and refactoring. I can write scripts so much faster and I keep finding helpful new features all the time.

KEITH RICHARDSON, Principal Software Architect Broughton Software

Choose the Edition that Suits You Best

	EXPRESS	STANDARD	PROFESSIONAL
Price	Free	\$199.95	\$249.95
Intelligent SQL completion	Basic functionality	✓	✓
SQL Formatting	Basic functionality	✓	✓
JOIN clause auto-generation		✓	✓
Code snippets collection		✓	✓
Custom alias mapping		✓	✓
T-SQL Refactoring			✓
Find invalid objects			✓
SSMS tabs coloring			✓
Result grid aggregates			✓
Semicolon insertion			✓
Execution notifications			✓
